

## The vision of polypoly

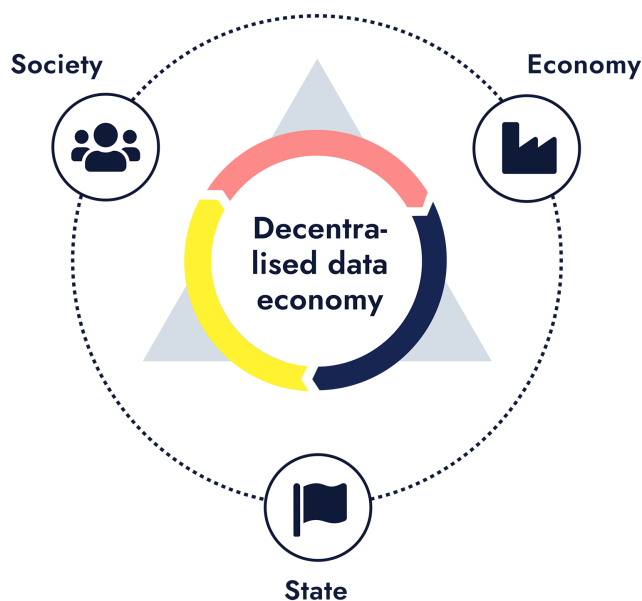

---

### CATEGORY

polypoly and  
the companies behind it

### TOPIC

Polypoly vision

We need a fair give and take between those who provide data and those who use it. For this we need a system from which everyone benefits. polypoly develops such an ecosystem and has a long-term vision for the three companies of the polyVerse:

**polypoly Enterprise** – focuses on the needs of business and plans to become a relevant infrastructure service provider for building business models in decentralized data economies.

**polypoly Foundation** – focuses on the needs of governments. The foundation's goal is to become a competent advisor for the creation of regulations and laws for decentralized data economies.

**polypoly Cooperative** – focuses on the needs of citizens. The long-term goal of the cooperative is to operate, together with its members, the largest ecosystem for the decentralized data economy in Europe.
